

Ken Daniel Llamanzares, CpE, SO2

Computer Engineer

Biñan, Laguna, Philippines | 0929-353-7204 | kd.llamanzares@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) with hands-on experience in technical support, embedded systems, full-stack web development, and machine learning. Skilled in building cloud-connected IoT systems, computer vision applications, AI-powered security tools, and workflow automation. Registered Safety Officer 2 (SO2) and TESDA-certified in Computer System Servicing with Lean Six Sigma Yellow Belt training.

EDUCATION

Bachelor of Science in Computer Engineering

August 2022 – July 2026

National University, Manila, Philippines

Core Competencies: Machine Learning, Full-Stack Development, REST API Design, Chrome Extension Development, Computer Vision, OCR, Prompt Engineering, Workflow Automation, CI/CD, Database Management, Debugging

Programming Languages: Python, PHP, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, Firebase SDK, OpenCV, TensorFlow, Scikit-learn, NumPy, Pandas, YOLOv7, YOLOv8

Tools & Platforms: Docker, Kubernetes, Git, GitHub, Cloudinary, MySQL, NoSQL, Postman, n8n, MCP, Vercel, Render, VS Code, Linux

PROFESSIONAL EXPERIENCE

Technical Support Engineer Intern

February 2026 – April 2026

Straive | Calamba, Philippines

- Delivered IT support across hardware and software environments through systematic diagnostics and troubleshooting, reducing end-user downtime.
- Performed system reformatting, OS installation, and workstation configuration, standardizing setups across users.
- Designed and deployed an internal web platform for the EUC team to centralize inventory tracking, production mapping, and task management.

PROJECTS

TrustMeBro AI – AI-Powered Phishing & Scam Detection Platform

Next.js, FastAPI, Docker, Chrome Extension (Manifest V3), Firebase, Gemini AI

- Built a full-stack cybersecurity platform (web app + Chrome extension) using Gemini AI and SSL/domain-age heuristics to detect phishing URLs, scam screenshots, malicious QR codes, and fake profiles, protecting Philippine banking and e-wallet users (GCash, Maya, BDO, BPI).
- Deployed a Dockerized FastAPI backend on Render with Firebase auth, OCR-based screenshot analysis, and a Manifest V3 Chrome extension featuring context-menu scanning, including full production setup (CORS hardening, custom domain, Chrome Web Store submission).

SwineWatch – ASF Detection and Monitoring System

Computer Vision & Machine Learning

- Built a real-time pig surveillance system using thermal imaging and Raspberry Pi cameras to detect early ASF symptoms, with a React/Tailwind dashboard, Firebase, and Cloudinary.

Digital Ears – Emotion Detection from Speech Signals

MATLAB, Digital Signal Processing

- Built a MATLAB-based speech emotion recognition system using short-time and mean energy features to classify Angry, Happy, and Sad emotions.

Recruitment Workflow Automation Project

n8n, Google Workspace APIs

- Designed a rule-based automation system for candidate screening, status updates, and email communication, streamlining recruitment.

CERTIFICATIONS

- Computer System Servicing NC II – TESDA National Certification
- Safety Officer 2 (SO2) – DOLE-accredited Safety Officer Training
- Lean Six Sigma Yellow Belt – Council for Six Sigma
- Introduction to Modern AI – Cisco Networking Academy
